

A RESOLUTION AUTHORIZING THE MAYOR AND THE FINANCE DIRECTOR TO BUY A PORTABLE GENERATOR FROM CUMMINS INTERSTATE POWER ON AN EMERGENCY BASIS

WHEREAS, the Village's current portable generator has become incapacitated and is incapable of being repaired; and

WHEREAS, the Village is required to have a portable generator on a stand-by basis at all times to meet EPA regulations; and

WHEREAS, the Service Director has obtained three (3) quotations and finds that the quotations from Cummins Interstate Power in the amount of \$16,100.00 is the lowest and best quotation; and

WHEREAS, the foregoing circumstances constitute a real present emergency within the provisions of Section 735.051 of the Ohio Revised Code.

NOW, THEREFORE, BE IT RESOLVED by the Council of the Village of Richfield, Summit County, State of Ohio, two-thirds of the members elected thereto concurring:

SECTION 1. That the Mayor and the Finance Director be, and they hereby are, authorized and directed to purchase a portable generator from Cummins Interstate Power on an emergency basis without the necessity of formal bidding and advertisement in an amount not to exceed \$16,100.00.

SECTION 2. This Resolution is hereby declared to be an emergency measure necessary for the immediate preservation of the public health, safety and welfare and for the further reason that it is immediately necessary in order to provide a portable generator for the Village's sanitary sewer system at the earliest possible date; wherefore, provided this Resolution receives the affirmative vote of two-thirds of the members of Council elected or appointed, it shall take effect immediately upon its passage and execution by the Mayor; otherwise, it shall take effect and be in force from and after the earliest period allowed by law.

PASSED: October 16, 2001

  
President of Council

ATTEST:

# Memo

**To:** Mayor Donald Larsen  
All of Council

**From:** Melanie A. Tibbs, Service Director

**CC:**

**Date:** 10/9/01

**Re:** Emergency Generator for Sanitary Sewer Department.

---

Please be advised that the existing generator for the sanitary sewer department is 14 years old. It was acquired used in 1992 from a local person who was behind in Village taxes. The generator at the time required some fixing and repair and has been band aided ever since.

The existing generator has become obsolete and a 30-kilowatt generator is no longer made.

We have received a price quote from Cummins Power for repair of the existing generator – the cost is \$7,063.89.

Considering the age of the existing generator and the cost for repair, we received 3 price quotes for new generators.

Price Quote:

A - Cummins Interstate Power Inc.

25 Kilowatt – less power than our existing generator.

\$15,315.00

Delivery – 8 - 10 weeks

B - Cummins Interstate Power Inc.

35 Kilowatt – more power than our existing generator. Great for our future growth on our stations.

\$16,100.00

Delivery – 8 - 10 weeks

C - Tri – State Pump Systems

35 Kilowatt – more power than our existing generator. Great for our future growth on our stations.

\$34,975.00

Delivery – 12 - 16 weeks

Please see attached quotes.

As you can see we would recommend Quote B – 35-kilowatt generator from Cummins Interstate Power. This unit will power our existing stations and is equipped for future expansion or use.

Please be advised that 5 of our 6 generators are from Cummins Interstate Power. We have an excellent working relationship with this company.

I have spoke with our Law Director, Chuck Riehl, who is preparing legislation for Tuesday's meeting. He stated that we could accept the bid of Cummins Interstate Power Inc. as an emergency, since we are required to have a portable generator as back up power to our sanitary sewer lines. This is a requirement of the EPA.

I thank you for your consideration on this matter.

Reps. ~

GENTLEMEN:

WE ARE PLEASED TO SUBMIT THE FOLLOWING QUOTATION FOR YOUR CONSIDERATION:

DESCRIPTION

SUBJECT: RE: Trailer Mounted Portable Generator

1 – Precision Systems heavy duty trailer with:

1 – 5000 pound axel, electric brakes, 5000 pound retractable tongue jack, heavy duty fenders, safety chain with 10,000 pound rated hooks, heavy duty rims, H78X15, 8 ply tires, DOT lighting package, license plate holder, 2 1/8" hitch. Heavy duty frame shall be made with 2" X 6" X 1/4" shot blasted rectangular tube and incorporate an integral fuel tank. Fuel tank to be made of 1/4" thick steel plate and have a capacity of 100 gallons.

1 – Onan 35.0 DGBB with 125 degree alternator and PMG excitation, circuit breaker, DC monitor, pre-low oil pressure, low oil pressure, pre-high engine temperature, high engine temperature, over crank, over speed and low coolant level, low and high fuel level alarm contact. AC meter package including voltmeter, ammeter, hour meter and frequency, battery, oil and anti-freeze. Voltage is 120/240 volt, single phase.

1 – Float type battery charger.

1 – SCY box and 35 feet of 3 conductor cord to power jacket heater and battery charger.
