RE: SR 303 Widening Project- Residents Information

09/11/2023

Dear Residents,

Fechko Excavating, LLC has been awarded the SR 303 Widening project. As the general contractor on the project, we are interested in providing the State of Ohio, Villag/Township of Richfield and its residents with a quality improvement project while maintaining a safe work zone. To accomplish these goals, we are asking for the cooperation of all project stakeholders including residents.

The purpose of this letter is to provide you some initial information related to the project and to convey our commitment in acting as a responsible contractor throughout the duration of the project.

PROJECT SCOPE OF WORK & TIMELINE

The scope of work associated with the SR 303 Widening project can generally be described as Maintaining eastbound traffic for the duration of the project and detouring westbound traffic Via I-271 and Wheatly Rd., lowering the roadway for increased sight distance and safety, installing storm drainage, pavement widening and resurfacing, adding a dedicated left and right turn lane to Sawbridge Dr. and a dedicated left turn lane to Briarwood Rd. The project will begin on September 18th, 2023 and is expected to be complete by December 31st, 2023.

As is the case with all improvement projects, the possibility of unforeseen delays and impacts to the construction timeline exists. Fechko Excavating, LLC understands that while these improvements will provide an overall benefit to the community when completed, the process of constructing them is an inconvenience to the community as a whole. Fechko is committed to being proactive and cooperative in mitigating any delays that may arise in the interest of seeing the project complete on-time.

SAFETY/MAINTENANCE OF TRAFFIC

Fechko takes its responsibility to maintain a safe worksite very seriously and we will continuously monitor and address potential safety concerns that may arise. Residents should assume that construction crews and equipment operators cannot see you until they have signaled to you that they are aware of your presence.

Fechko will do its best to maintain traffic flow through the construction zones; however, the nature of this construction may result in short-term access restrictions and delays to the flow of traffic. Please be patient with our crews as they perform their work and in turn they will do their best to get traffic moving and restore property access as soon as possible. Work occurring in front of your property may require that your property access is interrupted for short periods of time, usually for 30 minutes or less depending on the work being performed – please plan accordingly. If longer access restrictions are anticipated, we will do our best to notify you in advance. Emergency vehicle access takes priority and will be maintained throughout the project. Fechko will also do our best to coordinate and cooperate with other area service providers to limit the disruption of rubbish collection, postal and package deliveries.

Feel free to give us a call if you have any specific questions or concerns. We look forward to making this a safe and successful project.

Thank you.
